MEDIUM CAPACITY DRY SERVICE MALT MILL

HDP ADVANTAGES

- Grist production and quality optimized via:
- Prescribed surface texture, roll diameter, roll speed
- Instant micro-dial adjustment of upper and lower decks of rolls
- Balanced rolls and drive components
- Low horsepower, energy efficient milling
- Quiet, vibration-free positive belt drive of all rolls
- Compact, dust-tight mill and motor drive assembly

HDP 4 Roll Malt Mill

MAINTENANCE FEATURES

- All points of lubrication accessible from mill front
- Large hinged side safety guards
- Safety spring release design on rolls
- Constant force positive belt tensioning
- Side sampling port and sampling wand for both upper and lower decks
- Alternative hopper and malt inlet ports
- Safety magnets mounted at inlet
- Mill base houses drive motor, motor mount and discharge port
- Discharge port available for gravity drop auger or pneumatic conveyance

Micro dial adjustment provides precise roll gap control. Each roll deck features one stationary roll and one pivoting roll. All bearings are precision double row self aligning and sealed. Bearing supports, bearing pillows and roll shafts are robust. Mechanical operation of mill is smooth, quiet and cool, not generating and producing damaging heat. Side access ports are supplied for roll inspection and gap measurement.
